-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. Claims 1-64 are pending in this application.

Drawings

2. The drawings are objected to because the figure legends are required for every element of figures 1-7,9-10 and 13-17 . Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 64 is rejected under 35 U.S.C. 102(b) as being anticipated by Ashi et al (US 5,634,097).

Claim 64, Ashi et al discloses a path information acquiring unit (node 126 of figure 10) being mounted on a transfer route of a transfer signal passing through a communication network comprising: a first node (figure 10, node 120) used to receive a tracing signal which traces said transfer signal and which contains information about a path on said transfer route for said transfer signal; a second node (node 123 of figure 10) being mounted on said transfer route for said transfer signal and being used to receive said tracing signal; and wherein said path information acquiring unit (126) is connected to said first and second nodes so as to be communicable with each other and sends out said tracing signal to said first node and acquires path information contained in said tracing signal in transfer route for said transfer signal extending from said first node to said second node, from said second node (see figure 10 and column 2, lines 29-67).

Allowable Subject Matter

5. Claims 1-64 are allowed over prior art.

Art Unit: 2664

6. The following is a statement of reasons for the indication of allowable subject matter: the prior art made of record does not teach in combination a tracing signal residing unit, when having said tracing signal, to cause said tracing signal to be resident in said tracing signal residing unit and to produce a replica of said tracing signal; and a tracing signal sending unit to feed said replica of said tracing signal to nodes being adjacent to each other on said transfer route for said transfer signal.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brenda Pham whose telephone number is (571) 272-3135. The examiner can normally be reached on Monday-Friday from 9:00 to 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wellington Chin, can be reached on (571) 272-3134.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (571) 272-2600.
